REMARKS BY THE HONORABLE DOUGLAS M. COSTLE
ADMINISTRATOR, U.S. ENVIRONMENTAL PROTECTION AGENCY
PREPARED FOR DELIVERY BEFORE THE INTERNATIONAL CONFERENCE ON
"ALTERNATIVE ENERGY: PROSPECTS AND PRICE"
MONTREUX, SWITZERLAND, SATURDAY, MAY 17, 1980

ALTERNATIVE ENERGY SOURCES:

THE ENVIRONMENTAL CONSTRAINTS

Clearly it is not possible for me, in 20 minutes, to offer more than a brief summary of the environmental problems facing the development of alternative energy sources. But perhaps I can at least suggest the nature and seriousness of my country's commitment to such energy sources, and the resulting environmental challenges.

The spiraling cost of imported oil, the revolution in Iran and the gasoline lines in the summer of 1979 have intensified United States efforts to reduce national dependence on imported oil. The President has proposed a comprehensive and aggressive program to reduce this dependence and its deleterious effects on the nation's security and economy. On the energy supply side, the program emphasizes the use of domestic energy supplies, particularly coal and oil shale. On the demand side, conservation is encouraged, particularly for automobiles and homes.

Projections of U.S. energy resource requirements, assuming successful implementation of these conservation and production

initiatives, indicate a massive increase in coal mining and use as well as major growth in other fossil energy sources. Coal mining in the United States is projected to increase from the current 700 million tons annually to 1.4 billion tons in 1990 and 1.9 billion tons in 2000. Although most of this growth is associated with conventional coal combustion, production of synthetic liquids and gases is expected to consume 120 million tons by 1990 and 300 million tons in 2000. The next few years may well see the birth of a major oil shale industry producing up to 400,000 barrels of oil per day in 1990 and 1.2 million barrels per day by 2000.

Energy resource trends are moving away from traditional sources, e.g., domestic imported oil and onshore oil and gas, and moving toward resources with high potential for environmental damage: more coal (especially from western surface mining), oil shale, offshore oil and gas, unconventional natural gas and heavy oil. The trends also indicate increasing growth in nuclear energy for electricity.

Greater use of the coal, oil shale and nuclear fuels poses a major threat to human health and environmental protection. Potential problems could emerge at each step in the fuel cycle -- fuel extraction, processing and use. For example, increased coal and oil shale mining may increase erosion that subsequently increases runoff, which can contaminate surface waters. Or,

processing coal and oil shale to produce synthetic liquids and gases could release emissions and effluents contaminated with toxic materials. Increased coal combustion will increase production of nitrogen oxides, sulfur oxides and solid wastes over current levels, despite current emission regulations. And the increased reliance on nuclear power will produce large quantities of high-level radioactive waste.

Let me briefly discuss three energy activities that will present major environmental challenges in the years ahead:

* increased burning of coal;
* production of synthetic fuels from coal and oil shale, and
* the increased reliance on nuclear power plants.

Coal Combustion

Despite projections of a major coal-based synfuels industry, conventional combustion will continue to be the prime method of coal use well into the 21st century. The National Energy Act of 1978 orders the conversion of many industrial and utility power facilities from oil and gas to coal, and prohibits all new oil or gas utility boilers. Recently, the President proposed additional legislation to promote early retirement of many existing oil-fired power plants. Clearly, evolving energy policies emphasize greater reliance on coal for electricity and steam generation, and put increased importance on using economical, effective pollution-control technology. The chief

pollutants from coal are sulfur oxides, nitrogen oxides, particulates, and associated solid wastes of fly ash and sulfur sludge.

In addition to the serious health impacts associated with these three major air pollutants, sulfur oxides and nitrogen oxides increase the acidity of rainfall documented in Scandinavia and eastern North America. Such rains have already been implicated in the death of fish and other aquatic life in freshwater lakes, and may reduce forest and crop productivity.

The United States has clean air legislation that requires control technology for industrial plants and utilities, and for those existing sources which increase harmful air-pollution levels. This approach depends on the efficacy of applicable control technology. Fortunately, flue gas desulfurization -- "scrubbers" -- particulate control, and nitrogen oxide control technology have matured to the extent that major pollution reductions are possible at acceptable cost.

However, I want to emphasize that our research efforts are increasingly directed toward developing second-generation technologies that offer major performance and cost improvements. For example, we are in the early stages of a program aimed at demonstrating the ability of a unique coal burner to drastically reduce NOx emissions from utility and industrial boilers. The incremental cost associated with this approach

is projected to be minimal. Also, pilot scale studies suggest that limestone added to these burners offers low-cost oxide control. This appears to be a promising way to decrease acid rain, since it may be economically retrofitted on existing coal-fired boilers.

Synthetic Fuels

The U.S. has embarked on a major synthetic fuel effort aimed at reducing our need for imported oil. Although legislation has not yet been passed, Congress has agreed to initiate a synfuels program based primarily on coal and oil. This would produce the equivalent of 2 million barrels a day of liquids and gases by 1992.

The pollutants from synfuel processes are more diverse than those from direct combustion: they include a wide variety of high molecular weight organics, reduced sulfur compounds, and other compounds that must be carefully handled to avoid serious air, water, and land problems; particulates, nitrogen and sulfur oxides, trace elements, phenol-contaminated waste water, and hazardous solid wastes.

The major potential for water pollution will be through contamination of surface and groundwaters by leaching from landfills and evaporation ponds. Solid wastes from gasifiers (ash), water treatment (sludge), catalytic gas treatment (catalysts) and gas cleaning (sludge) must be carefully disposed of. For direct coal liquefaction systems, product toxicity is an important problem since pyrene, ethylbenzene and other carcinogens have been identified. Therefore, careful product handling, storage and utilization will be required.

Although oil shale processes and products have many of the same potential problems associated with coal liquefaction processes, they are unique in the huge quantities of solid material which must be handled during the mining and spent shale disposal operations. Shale oil recovery by surface retorting requires a large scale mining operation, which should be controlled as coal mines are. Spent shale, if not properly controlled, could create serious problems of pollutants leaching into the ground or into surface waters. With underground (in-situ) recovery techniques, the spent shale will be left in the ground creating the potential for contamination of groundwater, a scarce and vital resource in the western United States.

Although large scale synfuel plants have the potential for monumental environmental damage, we are convinced that the application of the best available controls can minimize the environmental problems associated with synfuel production and use. In some cases, technology may have to be borrowed and applied from related industries, such as petroleum refining and coke production. We think that all current environmental regulations can be achieved by intelligently designed and sited coal and oil shale commercial facilities. Detailed cost studies have indicated that such a level of control costs would add from 5 to 10% to the cost of the final fuel products.

The U. S. Environmental Protection Agency is in the process of developing a synthetic fuel regulatory strategy. Although we are

in the early stages of development, our goal is to promote the incorporation of the best controls available for all major synthetic fuel facilities at the earliest stages. This approach probably will involve early publication of pollution control technology guidance documents for the major synfuel processes. Although not legally binding, these would document the controls we believe represent the state-of-the-art and would be used as important sources of permit requirements.

We expect to publish guidance documents for every major synfuel process by 1981 in order to positively influence the first demonstration and commercial facilities. This presents a unique opportunity to establish controls at the same time as the processes are being developed and commercialized. Success here will mean that the industry can be spared costly retrofitting. This opportunity is generally recognized in the industry, and we have been pleased so far with the cooperative spirit that has been shown.

Nuclear Fission

The last alternative energy source I wish to mention is nuclear fission. At present, nuclear provides about 13 percent of U. S. electrical energy and about 4 percent of total energy use. For a variety of reasons, including slower rates of growth in electricity consumption and rapidly rising construction costs, American utility companies have delayed or cancelled 69 nuclear plants as of October, 1979..

Reactor safety continues to be controversial, especially since the Three Mile Island accident in March, 1979. The broad Carter Administration approach to nuclear power is one of cautious reliance on it as a transitional energy source while pursuing the development of other alternatives.

So far -- and to some degree in opposition to Congress -- the President has opposed the reprocessing of spent fuel to obtain plutonium for energy use. He has also decided to postpone commercial development of breeder reactors. For years, one commercial liquid metal fast breeder reactor has been under construction in the U.S.. But Mr. Carter believes that its design is uneconomic and obsolete, and has directed the government to undertake a study of alternative breeder designs before deciding on further development.

Apart from reactor safety, nuclear power raises a number of environmental issues. One is the extent of radiation hazard to which workers in nuclear plants are exposed. There is no scientific dispute that, at sufficiently high exposure levels, radiation causes serious biological damage. At much lower levels, however, few if any biological effects are detectable. The question arises, then, as to whether there is no biological effect, or whether the effect is small but cumulative -- increasing the risk of cancer after a latency period of years or even decades. This question has yet to be resolved.

Probably the most serious issue in the view of American scientists is the management of nuclear wastes -- particularly of high-level and transuranic wastes which have decay times ranging from hundreds to millions of years. Among the options being considered are mined repositories in geologic formations, placement in deep ocean sediments, placement in very deep drill holes, and ejection into space. Current thinking is that mined repositories are the most promising choice; until we know more about the reaction between geologic formations and waste forms, placement in the first repository should permit the waste to be retrieved.

A further problem with nuclear energy is the tailings generated by uranium mining -- between]0 and]5 million tons a year in the U.S. These contain radon and radium, which have half-lives of approximately 80,000 years.

A final concern about nuclear energy is the prospect of movement by some nations toward a plutonium economy. The U.S. is fortunate that its domestic uranium reserves are great enough to meet nuclear fuel needs at least until the year 2020; use of improved reactors such as the Canadian CANDU or advanced heavy water-and gas-cooled reactors being developed in the U.S. and Germany could stretch out our uranium reserves to the middle of the next century or beyond.

This assured supply permits us -- as President Carter has done -- to defer plutonium recycle indefinitely. I realize that not many nations have this advantage.

Our concerns about plutonium economies are well known: fear of diversion into weapons development, especially by unstable governments; the possibility of plutonium theft and threatened use by terrorist groups; and the hazards of the substance itself which -- with a half-life of 240,000 years -- is, for all practical purposes, eternal.

Conclusion

This concludes my discussion of some of the environmental constraints on the development of alternatives to oil. I would like to close with a few general observations about the environmental challenge ahead.

The environmental awareness that overtook the world so suddenly in the last decade is here to stay. In my country, the environmental movement began with a relatively few adults and students; words such as "ecology" and "biosphere" were strange to us. Today no American school child of any age can get through a single month without some classroom discussion of environmental problems.

The trend toward dirtier fuels and fuel-cycles appears irreversible. Over the next two decades, such a trend could seriously degrade the quality of our air, water, and land resources.

Despite this troubling trend, I remain optimistic that we can successfully resolve the potential conflicts between our energy and environmental goals. Such resolution will not be easy. It will require quite specific efforts from government and industry. For example:

* The research community must continue to define the magnitude of environmental threats, and develop improved methods to counter them;
* Legislative bodies must continue to improve environmental laws so that they provide maximum environmental protection at minimal cost;
* Regulatory agencies in the U.S. and other nations must improve both the effectiveness and the efficiency of their efforts, so that the large investment in environmental protection provides the maximum social return.
* Finally, the energy industry will have to incorporate environmental planning and control into its standard methods of doing business -- not simply to satisfy environmental law and public desire, but to protect its own future.

DRAFT DATE

PRUDHOE BAY OIL FIELD WATERFLOOD PROJECT 05/29

ALASKA
PROPOSED IS THE ISSUANCE OF PERMITS FOR THE CONSTRUCTION AND OPERATION OF A PROJECT TO RECOVER AN ADDITIONAL BILLION BARRELS OF OIL FROM THE CURRENTLY PRODUCING PRUDHOE BAY OIL FIELD IN THE NORTH SLOPE BOROUGH OF ALASKA. THE PROJECT WOULD INCLUDE: 1) WIDENING, RAISING AND EXTENDING AN EXISTING GRAVEL CAUSEWAY IN THE BEAUFORT SEA; 2) CONSTRUCTION AND OPERATION OF A SEAWATER INTAKE AND TREATMENT PLANT; 3) CONSTRUCTION OF SIX NEW GRAVEL PADS AND RELATED FACILITIES FOR PRESSURIZING AND DISTRIBUTING SEAWATER; 4) CONSTRUCTION AND MAINTENANCE OF ABOUT 196 KM OF PIPELINE; AND 5) WIDENING 27 EXISTING GRAVEL PADS AND CONSTRUCTION OF ONE NEW GRAVEL PAD TO ACCOMMODATE WATER INJECTION WELLS. (ALASKA DISTRICT)
(EIS ORDER # 800416)

MAALAEA LIGHT-DRAFT HARBOR, ISLAND OF MAUI 05/05

HAWAII
COUNTY: MAUI
PROPOSED ARE NAVIGATION IMPROVEMENTS FOR MAALAEA LIGHT-DRAFT VESSEL HARBOR IN THE COUNTY OF MAUI, ISLAND OF MAUI, HAWAII. PLAN 1 INCLUDES: 1) A 620-FOOT LONG EXTENSION TO THE EXISTING SOUTH BREAKWATER, 2) ADDITION OF A 400-FOOT LONG REVETTED MOLE ON THE SEAWARD SIDE OF THE EXISTING SOUTH BREAKWATER, 3) A 610-FOOT LONG ENTRANCE CHANNEL, 4) A 12-FOOT DEEP TURNING BASIN, 5) A 50-FOOT WIDE, 720-FOOT LONG INTERIOR REVETTED MOLE, AND 6) A 8-FOOT DEEP BERTHING AREA. PLAN 2 AND 3 ARE SIMILIAR TO PLAN 1 WITH SLIGHT MODIFICATION.
(HONOLULU DISTRICT)
(EIS ORDER # 800342)

MARYLAND COAST AND ASSATEAGUE ISLAND BEACH EROSION 05/13

MARYLAND VIRGINIA
PROPOSED ARE BEACH EROSION AND HURRICANE PROTECTION PLANS FOR THE ATLANTIC COAST OF MARYLAND AND ASSATEAGUE ISLAND, VIRGINIA. PLAN 1 CONSISTS SOLELY OF BEACH NOURISHMENT FOR THE PURPOSE OF EROSION CONTROL. PLAN 2 PROVIDES FOR STORM PROTECTION ONLY. PLAN 3 IS A COMBINED PLAN PROVIDING STORM

PROTECTION AND EROSION CONTROL. PLAN 4 PROVIDES FOR LIMITED STORM PROTECTION. PLAN 5 CONSISTS OF NONSTRUCTURAL MEASURES WHICH UTILIZE THE EXISTING BEACH.
(BALTIMORE DISTRICT)
(EIS ORDER # 800369)

Draft

CEDAR RIVER RECREATIONAL HARBOR, J.W. WELLS SP 05/05

MICHIGAN
COUNTY: MENOMINEE
PROPOSED ARE NAVIGATIONAL IMPROVEMENTS FOR THE CEDAR RIVER RECREATIONAL HARBOR WITHIN THE J.W. WELLS STATE PARK, MENOMINEE COUNTY, MICHIGAN. THE PROJECT WOULD CONSIST OF: 1) CONSTRUCTION OF A NEW EAST PIER, 2) REHABILITATION OF THE OLD WEST PIER, 3) DREDGING OF AN ENTRANCE AND INNER CHANNEL WITH TURNING BASIN, 4) REMOVAL OF THE REMNANTS OF THE OLD EAST PIER, AND 5) BEACH NOURISHMENT OF THE SHORELINE ZONE ADJACENT TO THE LAKEWARD SIDE OF THE PROPOSED EAST PIER.
(DETROIT DISTRICT)
(EIS ORDER # 800343)

GREEN BROOK SUB-BASIN FLOOD CONTROL 05/06

NEW JERSEY
COUNTY: SOMERSET MIDDLESEX UNION
PROPOSED IS A FLOOD CONTROL PLAN FOR THE GREEN BROOK SUB-BASIN IN SOMERSET, MIDDLESEX AND UNION COUNTIES, NEW JERSEY. THE SELECTED PLAN WOULD INCLUDE LEVEES AND FLOODWALLS IN THE LOWER BASIN PORTION. SEVERAL ALTERNATIVES ARE CONSIDERED FOR EACH OF THE THREE AREAS OF THE BASIN.
(NEW YORK DISTRICT)
(EIS ORDER # 800347)

SAIPAN SMALL BOAT HARBOR, SAIPAN 05/15

US TERRITORY
PROPOSED IS THE CREATION OF A SMALL BOAT HARBOR ON THE ISLAND OF SAIPAN IN THE COMMONWEALTH OF THE NORTHERN MARIANA ISLANDS. THE GARAPAN DOCK AND SAIPAN HARBOR AREAS ARE BEING STUDIED. BOTH PLANS CONSIST OF DREDGING AN ENTRANCE CHANNEL AND BASIN AND THE CONSTRUCTION OF PROTECTIVE ROCK STRUCTURES. PLAN 2 (SAIPAN HARBOR) WOULD INVOLVE LESS DREDGING THAN PLAN 1 (GARAPAN DOCK).
(HONOLULU DISTRICT)
(EIS ORDER # 800364)

LAKE TEXOMA, DENISON DAM MODIFICATION 05/07

TEXAS OKLAHOMA
COUNTY: SEVERAL
PROPOSED IS THE MODIFICATION OF DENISON DAM LOCATED ON LAKE TEXOMA IN LOVE, MARSHALL AND BRYAN COUNTIES, OKLAHOMA AND GRAYSON AND COOK COUNTIES, TEXAS. THE PREFERRED PLAN INVOLVES: 1) CONSTRUCTION OF TWO 35,000 KW HYDROELECTRIC

GENERATING UNITS, 2) CONVERSION OF STORAGE FROM HYDROPOWER TO YIELD 65 MGD FOR WATER SUPPLY, 3) 25 MGD FOR IRRIGATION, AND 4) CONSTRUCTION OF RECREATIONAL FACILITIES TO ACCOMMODATE AN ADDITIONAL 1.3 MILLION ANNUAL VISITORS. TWO ALTERNATIVE PLANS ARE ALSO CONSIDERED.
(TULSA DISTRICT)
(EIS ORDER # 800348)

FINAL DATE

HARRY S. TRUMAN PARKWAY, SAVANNAH, PERMIT 05/07

GEORGIA
COUNTY: CHATHAM
PROPOSED IS THE ISSUANCE OF A PERMIT TO AUTHORIZE VARIOUS ACTIVITIES ASSOCIATED WITH THE CONSTRUCTION OF THE HARRY S. TRUMAN PARKWAY IN SAVANNAH, CHATHAM COUNTY, GEORGIA. THE PARKWAY WOULD BE AN 11-MILE TOLL ROAD. MAJOR CONSTRUCTION ACTIVITIES INCLUDE: DREDGING; DISCHARGE OF DREDGED OR FILL MATERIAL INTO THE VERNON RIVER AND SEVERAL WETLAND AREAS; AND RELOCATION OF SEGMENTS OF THE CASEY CANAL AND EMBANKMENT CONSTRUCTION IN THE EXISTING CANAL; CONSTRUCTION OF A PUMP STATION; AND PLACEMENT OF A TEMPORARY PIPELINE ACROSS THE SAVANNAH RIVER.

Draft SUPPLEMENT DATE

BIG STONE LAKE-WHETSTONE RIVER (DS-1) 05/09

MINNESOTA SOUTH DAKOTA
COUNTY: SEVERAL
PROPOSED IS THE BIG STONE LAKE-WHETSTONE RIVER MODIFICATION PROJECT LOCATED IN BIG STONE AND LAC QI PARLE COUNTIES, MINNESOTA AND GRANT COUNTY, SOUTH DAKOTA. THIS SUPPLEMENT HAS BEEN PREPARED TO ADDRESS A SIGNIFICANT CHANGE FOR THE PROPOSED DIVERSION CHANNEL INTO THE US-75 RESERVOIR IN THE BIG STONE NATIONAL WILDLIFE REFUGE. THIS STATEMENT SUPPLEMENTS A FINAL EIS, #710520, FILED 12-18-70.
(ST. PAUL DISTRICT)
(EIS ORDER # 800359)

SAN ANTONIO CHANNEL IMPROVEMENTS (DS-1) 05/30

TEXAS
COUNTY: BEXAR
PROPOSED IS A CHANNEL IMPROVEMENT PROJECT FOR THE SAN ANTONIO CHANNEL IN BEXAR COUNTY, TEXAS. THE ALTERNATIVES CONSIDER NO ACTION, STRUCTURAL MEASURES, AND NONSTRUCTURAL MEASURES. NONSTRUCTURAL MEASURES CONSIDERED INCLUDE FLOOD WARNING SYSTEMS AND FLOOD PLAIN EVACUATION. THE STRUCTURAL

ALTERNATIVES CONSIDERED ARE: 1) VERTICAL WALL CROSS SECTIONS, 2) GRASS-LINED TRAPEZOIDAL CHANNEL CROSS SECTION, 3) COMBINATION OF TRAPEZOIDAL AND VERTICAL WALL CROSS SECTION, AND 4) U-FRAME PILOT CHANNEL. THIS STATEMENT SUPPLEMENTS A FINAL EIS, #721179, FILED 11-9-71.

WOONSOCKET INDUSTRIAL PARK-EAST, GRANT 05/09

RHODE ISLAND
COUNTY: PROVIDENCE
PROPOSED IS THE AWARDING OF A GRANT FOR THE CONSTRUCTION OF THE WOONSOCKET INDUSTRIAL PARK-EAST IN WOONSOCKET, PROVIDENCE COUNTY, RHODE ISLAND. THE INDUSTRIAL PARK WOULD INVOLVE THE INSTALLATION OF UTILITIES AND THE CONSTRUCTION OF A ROADWAY. THE ALTERNATIVES CONSIDER: 1) DEVELOPMENT OF OTHER INDUSTRIAL SITES WITHIN THE CITY, 2) DEVELOPMENT OF REGIONAL INDUSTRIAL PARKS OUTSIDE THE CITY, AND 3) ALTERNATIVE MEANS OF DEVELOPING THE EAST WOONSOCKET AREA FOR INDUSTRIAL USE.
(EIS ORDER # 800357)

NAT'L OCEANIC AND ATMOSPHERIC ADMIN.

DRAFT DATE

LOOE KEY NATIONAL MARINE SANCTUARY 05/09

FLORIDA REGULATORY
PROPOSED ARE REGULATIONS IMPLEMENTING DESIGNATION OF WATERS AT LOOE KEY, FLORIDA AS A NATIONAL MARINE SANCTUARY. THE KEY IS A SUBMERGED SECTION OF THE FLORIDA REEF TRACT IN THE FLORIDA KEYS AND WILL CONSIST OF 5 SQUARE NAUTICAL MILES OF HIGH SEAS WATERS. THE REGULATIONS WOULD ALLOW THE POSSESSION AND COLLECTION OF CORAL AND DISTURBANCE OF HISTORICAL AND CULTURAL RESOURCES, BY PERMIT ONLY. THEY WOULD PROHIBIT: 1) SPEARFISHING; 2) USE OF LOBSTER TRAPS; 3) USE OF WIRE FISH TRAPS; 4) ANCHORING ON CORAL; AND 5) DISCHARGE OF POLLUTED WATER, FISH PARTS OR CHUM.
(EIS ORDER # 800360)

GRAY'S REEF MARINE SANCTUARY 05/30

GEORGIA Regulatory
PROPOSED IS THE DESIGNATION OF THE WATERS AT GRAY'S REEF, A SUBMERGED LIVE BOTTOM AREA ON THE SOUTH ATLANTIC CONTINENTAL SHELF LOCATED 17.5 NAUTICAL MILES DUE EAST OF SAPELO ISLAND, GEORGIA, AS A MARINE SANCTUARY. THE DESIGNATION OF A MARINE SANCTUARY WOULD PROVIDE A PROGRAM OF INTEGRATED

MANAGEMENT AND REGULATIONS TO GOVERN RECREATIONAL ACTIVITIES, CERTAIN ACTIVITIES UNDER PERMIT FOR SCIENTIFIC AND EDUCATIONAL PURPOSES, SEABED ALTERATION AND CONSTRUCTION, BOTTON TRAWLING AND SPECIMEN DREDGING, WIRE TRAP FISHING, MARINE SPECIMEN COLLECTING, AND TAMPERING WITH OR REMOVAL OF SUBMERGED HISTORIC AND CULTURAL RESOURCES.
(EIS ORDER # 800419)

Draft

MISSISSIPPI COASTAL MANAGEMENT PROGRAM, CZM 05/09

MISSISSIPPI
COUNTY: SEVERAL
PROPOSED IS APPROVAL OF THE MISSISSIPPI COASTAL MANAGEMENT PROGRAM. APPROVAL WOULD ALLOW PROGRAM ADMINISTRATIVE GRANTS TO BE AWARDED TO THE STATE, REQUIRE THAT FEDERAL ACTIONS BE CONSISTENT WITH THE PROGRAM, AND ENHANCE MANAGEMENT OF THE STATE'S COASTAL RESOURCES ACCORDING TO THE COASTAL POLICIES AND STANDARDS. THE EFFECT OF THESE POLICIES IS TO CONDITION, RESTRICT OR PROHIBIT VARIOUS ACTIVITIES IN PARTS OF THE COASTAL AREA, WHILE ENCOURAGING DEVELOPMENT AND OTHER USES IN OTHER PARTS.
(EIS ORDER # 800354)

NEW JERSEY COASTAL MANAGEMENT PROGRAM 05/08

NEW JERSEY
COUNTY: SEVERAL
PROPOSED IS THE NEW JERSEY COASTAL ZONE MANAGEMENT PROGRAM. THE PROGRAM WOULD ENHANCE GOVERNANCE OF THE COASTAL LAND AND WATER AREA AND USES ACCORDING TO THE COASTAL POLICIES AND STANDARDS. THE EFFECT OF THESE POLICIES WOULD BE TO CONDITION, RESTRICT OR PROHIBIT SOME USES IN PARTS OF THE COASTAL ZONE, WHILE ENCOURAGING DEVELOPMENT AND OTHER USES IN OTHER PARTS.
(EIS ORDER # 800350)

PENNSYLVANIA COASTAL MANAGEMENT PROGRAM, CZM 05/30

PENNSYLVANIA
PROPOSED IS THE STATE OF PENNSYLVANIA COASTAL ZONE MANAGEMENT PROGRAM. APPROVAL WOULD ALLOW PROGRAM ADMINISTRATIVE GRANTS TO BE AWARDED TO THE STATE, AND REQUIRE THAT FEDERAL ACTIONS BE CONSISTENT WITH THE PROGRAM. IMPLEMENTATION OF THE PROGRAM WILL ENHANCE GOVERNANCE OF THE STATE'S COASTAL LAND AND WATER AREAS AND USES ACCORDING TO THE COASTAL POLICIES AND STANDARDS. THE EFFECT OF THESE POLICIES IS TO CONDITION, RESTRICT OR PROHIBIT VARIOUS USES IN PARTS OF THE COASTAL ZONE, WHILE ENCOURAGING DEVELOPMENT AND OTHER USES IN OTHER PARTS.
(EIS ORDER # 800418)

DRAFT DATE

SPINY LOBSTER FISHERY, FMP 05/22
PUERTO RICO VIRGIN ISLANDS
PROPOSED IS A FISHERY MANAGEMENT PLAN FOR THE SPINY LOBSTER FISHERY LOCATED IN THE MARINE WATER EXTENDING OFFSHORE OF THE COMMONWEALTH OF PUERTO RICO AND THE TERRITORY OF THE VIRGIN ISLANDS, TO THE OUTER LIMITS OF THE US FISHERY CONSERVATION ZONE. THE PLAN WOULD PROVIDE REGULATORY CONTROLS ON SIZE AND SEX OF LOBSTERS TO BE HARVESTED, GEAR RESTRICTIONS, DATA COLLECTION AND THE ESTABLISHEMENT OF CERTAIN SANCTUARIES. THE ALTERNATIVES CONSIDER: NO ACTION, LESS RESTRICTIVE MANAGEMENT, AND MORE RESTRICTIVE MANAGEMENT.
(EIS ORDER # 800303)

NARRAGANSETT BAY ESTUARINE SANCTUARY, GRANT 05/16

RHODE ISLAND
PROPOSED IS THE AWARDING OF A GRANT FOR ESTABLISHMENT OF AN ESTUARINE SANCTUARY IN NARRAGANSETT BAY, RHODE ISLAND. THE GRANT WOULD BE USED FOR ACQUISITION OF 203 ACRES OF UPLANDS AND WETLANDS ON PATIENCE ISLAND. THE SANCTUARY WOULD BE USED PRIMARILY FOR RESEARCH AND EDUCATIONAL PURPOSES, ESPECIALLY TO PROVIDE INFORMATION USEFUL FOR COASTAL ZONE MANAGEMENT DECISION MAKING. RECREATIONAL USES WOULD BE ENCOURAGED WHERE COMPATIBLE. BOUNDARY AND MANAGEMENT ALTERNATIVES ARE CONSIDERED.
(EIS ORDER # 800378)

NORTHERN MARIANA ISLANDS COASTAL RESOURCES MGMT. 05/16

US TERRITORY
PROPOSED IS A COASTAL RESOURCES MANAGEMENT PLAN FOR THE COMMONWEALTH OF THE NORTHERN MARIANA ISLANDS. APPROVAL WOULD PERMIT IMPLEMENTATION OF THE PROPOSED PROGRAM, ALLOW PROGRAM ADMINISTRATION GRANTS TO BE AWARDED TO THE STATE, AND REQUIRE THAT FEDERAL ACTIONS BE CONSISTENT WITH THE PROGRAM. THE EFFECT OF THESE POLICIES AND STANDARDS IS TO CONDITION, RESTRICT, OR PROHIBIT SOME USES IN PARTS OF THE COASTAL ZONE, WHILE ENCOURAGING DEVELOPMENT AND OTHER USES IN OTHER PARTS.
(EIS ORDER # 800375)

PADILLA BAY ESTUARINE SANCTUARY, GRANT 05/01

WASHINGTON
COUNTY: SKAGIT
PROPOSED IS THE AWARDING OF A GRANT FOR THE ACQUISITION OF 11,612 ACRES AND THE CREATION OF THE PADILLA BAY ESTUARINE SANCTUARY LOCATED IN SKAGIT COUNTY, WASHINGTON. OF THE TOTAL AMOUNT, APPROXIMATELY 1,260 ACRES WILL BE ACQUIRED IN LESS THAN FEE SIMPLE, ALL OTHER IN FEE. THE LANDS TO BE ACQUIRED ARE PRESENTLY OWNED BY STATE AND LOCAL AGENCIES, AND PRIVATE BUSINESSES AND OWNERS.
(EIS ORDER # 800333)

102 MONITOR

The 102 Monitor is a monthly publication of the Environmental Protection Agency. In addition to its listing of Environmental Impact Statements which have been filed under the provisions of the National Environmental Policy Act (NEPA), the Monitor contains a list of EPA's comments, filed under the provisions of Section 309 of the Clean Air Act, as amended; items of current concern in NEPA case law; information on the environmental studies of the Council on Environmental Quality; and other matters of interest.

The 102 Monitor is printed and distributed by the Government Printing Office. The subscription rate for the Monitor is $20.00 annually, with an additional $5.00 charge for foreign mailing; individual copies of the Monitor are $1.70 domestic and $2.15 foreign and are available from GPO.
